 Physical appliance

Supporting Top IT Initiatives

Advanced

- Secure Access to the cloud and data center for BYOD users.
- Control access to Office 365 and other cloud apps with user or device identity.
- Enable seamless access to data center and cloud apps with secure single sign-on.

Enterprise

- Secure IoT devices residing on your corporate network and servers.
- Enable your business ecosystem with Secure Access for guests, contractors and partners.

Suite Edition	What it does
Essentials	Simplifies how customers securely connect workers to data centers.
Advanced	Extends capabilities to mobile users and cloud applications while also giving complete visibility of what's on the corporate network.
Enterprise	Delivers the entire product portfolio to secure mobile users and protect cloud applications while also giving complete visibility of what's on the corporate network and enforcing security compliance.
